PROJECTS

| | |
|-----------------------|---|
| Dec. 2021 – Present | Generative Human Motion Stylization HUAWAI TECHNOLOGIES CANADA |
| | <ol style="list-style-type: none"> The goal is to stylize an existing 3D motion with style clues from for example, motion, label or priors. Found that stylizing motion in latent space is more efficient than in pose space. Designed a generative framework which enables diverse and novel stylization (Demo). |
| Jan. 2021 – Dec. 2022 | Language Grounded 3D Human Behavior Modeling and Understanding UNIVERSITY OF ALBERTA |
| | <ol style="list-style-type: none"> Aimed to synthesize 3d human behaviors from text descriptions or in the inverse way, i.e. understand human behaviors through texts. Annotated so-far the largest motion-language dataset, with 15k motions captioned by 50k descriptions. A novel approach that generates realistic human motion with temporal VAE and RNNs (Demo) [4]. Built mutual mappings between 3D human motions and texts, motion captioning and text2motion generation respectively, using vector quantization and Transformers. [2] |
| Sep. 2019 – Jan. 2021 | 3D Human Action and Video Generation UNIVERSITY OF ALBERTA |
| | <ol style="list-style-type: none"> The topic is to generate human behaviors conditioned on action categories. Synthesized visually pleasing human motions by a novel VAE-based (i.e. Variational AutoEncoder) network with Lie pose representation, and curated own dataset (Demo Webpage) [8]. Built up a novel pipeline to generate human videos from action type & single image with graphics & machine learning apparatus (Demo) [6]. |
| Sep. 2017 – Mar. 2019 | Fake News Detection on Social Media ICT, CHINESE ACADEMY OF SCIENCES |
| | <ol style="list-style-type: none"> Designed, implemented and deployed algorithms for a real-time online fake news detection system[†]. Exploited the roles of emotion, multimodal contents and propagation for news credibility [9]. Developed a distributed crawling system that collected over 10 million posts from Weibo platform. |

[†]The program selected **top 30** students amongst 281 in the 1st school year.
