PROJECTS

Jan. 2021 - Dec. 2023

Language Grounded 3D Human Behavior Modeling and Understanding

University of Alberta

- 1. Aimed to synthesize 3d human behaviors from text descriptions or in the inverse way, i.e. understand human behaviors through texts.
- 2. Annotated so-far the largest motion-language dataset, with 15k motions captioned by 50k descriptions.
- 3. A novel approach that generates realistic human motion with temporal VAE and RNNs (Demo) [7].
- 4. Built mutual mappings between 3D human motions and texts, motion captioning and textzmotion generation respectively, using vector quantization and Transformers. [5]
- 5. A motion generator and editor based on generative masked Transformer and residual quantization. [1].

Feb. 2023 - May. 2023

Generative Human Motion Stylization

Huawei Technologies Canada

- 1. The goal is to stylize an existing 3D motion with style clues from for example, motion, label or priors.
- 2. Found that stylizing motion in latent space is more efficient than in pose space.
- 3. Designed a generative framework which enables diverse and novel stylization (Demo) [2].

Sep. 2019 - Jan. 2021

3D Human Action and Video Generation

University of Alberta

- 1. The topic is to generate human behaviors conditioned on action categories.
- 2. Synthesized visually pleasing human motions by a novel VAE-based (i.e. Variational AutoEncoder) network with Lie pose representation, and curated own dataset (Demo Webpage) [11].
- 3. Built up a novel pipeline to generate human videos from action type & single image with graphics & machine learning apparatus (Demo) [9].

^oThe program selected top 30 students amongst 281 in the 1st school year.

News Credibility Evaluation on Social Media

ICT, CHINESE ACADEMY OF SCIENCES

- Designed, implemented and deployed algorithms for a real-time online news verification system¹.
- 2. Exploited the roles of emotion, multimodal contents and propagation for news credibility [12].
- 3. Developed a distributed crawling system that collected over 10 million posts from Weibo platform.
